Subject: Buying Yupiteru MVT-7100 (from ACE Communications?)
To: info-hams@ucsd.edu

Andrew,

I tried to order a Yupiteru MVT7100 based on the ACE Commun-

ications ad on page 11 of the November Popular Communications, shown at \$599. "Debbie" at ACE told me that they weren't in stock because a whole container load had "disappeared in transit". After mulling this over for a few days and becoming increasingly uneasy, I called and cancelled the order. I have since learned that they cannot sell that scanner legally in the US. I got mine from Javiation. In the same issue on page 80 is another ACE ad showing both the Yupiteru MVT8000 and MVT7000 for \$399 each.

David Eitelbach

Login to ftp.cs.buffalo.edu is via "user" -- then at the foreign username prompt use "anonymous" and use your full mail ID as the password when asked.

Kenneth: Many university (and public) libraries here in the U.S. consider QST and CQ technical journals and as a result they subscribe one or both; have you checked N.I.T.'s library thoroughly? (save some money that way!)

To: info-hams@ucsd.edu

I need a little help with an English paper I am writing. The topic I am writing about is jargon used by amateur radio operators. I am already using ham, lids and an abbreviation. What I need is one more word that has an interesting etymology.

Does any have any good suggestions? I am stuck and would like another term. Please send me Email

Thanks
Sue

> Nice try loser.

Loser? In what way? I'm sure I've done a lot more with my life than you have.

> You're the one with the fixation.

Tell us more about cops' uniforms.

>Post after post about
> the "problem" at the university. How come you're the only one complaining?
> Surely you're not the only heterosexual left on campus.

You (or someone else) brought up the 'gerbils'; there was no mention of gays (since last year) until that point.

You must be new to this newsgroup. Go back and read last year's stuff I wrote about what the campus administration is doing about the problem. The complaints came from several high-level positions, not me.

> By the way, I'm glad to see that the phrase "wannabe" has gotten to you.

Gotten to me? Nope. Not in the slightest. I'm amused that there are folks like you who ridicule others who try to do some good.

> Perhaps if you stop playing net.cop people will stop calling you that.

No no no. Hamster cop, not net.cop.

> Handy usenet flame tip: wrap the keybaord in Saran Wrap(tm) prior to
> responding to personal attacks. It makes it easier to keep the spittle
> off the keys while frothing over the posting you're quoting.

Frothing? Nope. Having fun seeing you get so agitated. I'm surprised you didn't use any four-letter words this time, though. There are better ways to express yourself, you know.

As long as you keep posting mean-spirited articles about me I'll respond (in case everyone else is asking 'How long is this going to go on?'). Remember, YOU initiated this - I apparently never paid any attention to anything you wrote prior to your flaming me last week. Didn't really know you even existed.

Oh, I'll be glad to take this to email so as to spare the net anymore of these non-r.r.a.misc postings (you probably want an audience, though).

Actually, Julian, the really hard part.....oops better change that...
the difficult part is finding a place to pin on your callsign tag ... and
trying to find a place to painlessly hook the speaker mike on the
handheld.....

: If the ARRL is making a loud noise about the Online Repeater Project, how
: much of EXPLOSION did they make when the Online Callbook came out? IMHO
: there is no difference between the ARRL callbook and the Callbook, except
: ease of use. Both Callbooks were targeted for different individuals. For
: those with internet access, the on-line callbook is perfect, for those without
: internet access, use the printed version! Both versions supply the same
: information!

Hi Lynn,

The league probably didn't scream when the on-line callbooks were
published because they don't publish a printed callbook. The other
reason they don't complain is that the source of the call book is the FCC
who doesn't have a copyright on the info. once you pay the \$600 for it
you can publish it in what ever form at whatever cost you like. They are
complaining because they feel that copying the info out of their
directory and making it available to the public is a violation of their
copyright.

cheers,
Dan

Ironic how we suspect each other's past: your hang up with cops' belts -
leather whips and chains, too?

Not much happened in the Coast Guard other than getting paid to play with
radios and the satisfaction of helping to save some lives; firefighting

back in So. Calif. was more exciting, though.

You're in Compton, Cow? Growing with with your scanner, if you listened to the Orange County fire channels, you probably heard me on the air from time to time (46.16 MHz).

To: info-hams@ucsd.edu

I have uploaded to the SimTel Software Repository (available by anonymous ftp from the primary mirror site OAK.Oakland.Edu and its mirrors):

pub/msdos/hamradio/
sm410.zip Super Morse: Morse code tutorial and practice

Super Morse v4.10 by M. Lee Murrah (71016.1355@CompuServe.COM) is a Morse code tutorial and practice program. It can be used with the PC's speaker or a Sound Blaster or compatible card.

Requirements:

Memory: 384K
Drive : Floppy disk or hard drive
Mouse : Microsoft
Serial Ports: 3 for full use of Super Morse features.
Video : Monochrome or color

Changes:

- * Increased variability of text in internally generated QSOs.
- * Compensated for speed change that occurs when code weighting changes.
- * Character review that is available when an error is made in the Learn quizzes is now selectable.
- * Display of character choices in Learn prompts is now selectable.

Oooops! The problem you are having has to do with all the things
Windows thinks it needs to be involved in, even though you are totally
unaware of all the activity... after all, it is Bill, and it is M/S
under neath all that...

When you select a DOS prompt from Windows, all the garbage gets hauled around with you and the machine is kept VERY busy with its own housekeeping... and doesn't care that YOU want to play with SuperMorse.

The same is true of many other TIME dependent programs that simply will NOT work under windows and require the *full* "attention" of the machine...like SuperMorse.

It is a problem with WINDOWS and NOT with SuperMorse. When you want to do code practice, just quit windows and go for it... if that is too much trouble, get one of those wimpy plug and play not problem to use with built in graphics interface (Mac) and enjoy life as a user... ;^)

Hi

I will be traveling to Mexico and I was wondering if anyone could tell me what repeaters are on the Pacific cost from LA to Alcapolco?

Also is my US license good in Mexico or do I have to get permission

from Mexico (license) to operate there? If I need a Mexican license how do I get one?

Thanks for the help. Please email me directly or post to the net.

For about \$6.00 you can buy the ARRL Repeater Directory. The same directory that is currently being whined about. In it you will find repeaters for the whole U.S.. Also every band is covered separately. Plus the European (Region 1) VHF/UHF band plans are in there.

You can pick up this directory in any ham store, or buy it direct from the evil ARRL.
